

ELECTRIC SOUP WARMER

TKCU-BSW

STANDARD FEATURES

10 Liters

- ✓ Made with a heavy-duty stainless steel interior and a sturdy exterior, this soup warmer ensures long-lasting durability and reliability, making it ideal for commercial kitchens and high-traffic environments.
- ✓ The soup warmer can hold up to 10 liters of soup, allowing you to serve large quantities efficiently. This high capacity is perfect for catering events, buffets, and restaurants, ensuring that you can meet high demand with ease.
- ✓ Equipped with an adjustable thermostat, the soup warmer provides precise temperature settings to keep your soup at the perfect serving temperature. The easy-to-read temperature dial allows for quick adjustments, ensuring optimal food safety and quality.
- ✓ The removable stainless steel insert makes cleaning and refilling the soup warmer a breeze. The hinged lid reduces heat loss and prevents contamination, while the indicator light shows when the unit is heating, providing a user-friendly and efficient experience for operators.
