

GAS CANDY FLOSS MACHINE

TKCU-GCF

STANDARD FEATURES

Counter model

- ✓ This candy floss machine works continually and yields one serving every 30 seconds, capable of producing up to 7 servings per minute. Its powerful motor ensures quick and efficient operation, perfect for high-demand events.
- ✓ Equipped with a built-in fuse, electric leakage protection switch, and a volt controller with a display meter, this machine ensures safe and stable operation. The power stabilization feature helps save electricity while making cotton candy.
- ✓ The machine includes an ON-OFF power button switch and a knob temperature controller for easy operation. The large, detachable stainless steel pan is easy to assemble and clean, while the stainless steel scoop makes sugar refilling convenient.
- ✓ Designed with a large drawer for storage and four clasps to reduce vibration, this machine is stable and easy to transport. It comes with a cart featuring two pre-inflated wheels, making it convenient to move around at events. Additionally, the extremely glossy surface prevents sugar conglutination, ensuring a smooth and efficient operation.
