

POP CORN MACHINE

TKCU-PPMS

STANDARD FEATURES

227g capacity

- ✓ The popcorn machine features a durable stainless steel body, ensuring long-lasting performance and resistance to corrosion. Its robust construction makes it ideal for continuous use in high-traffic areas such as movie theaters, carnivals, and concession stands.
- ✓ With a 227-gram kettle, this popcorn machine can produce up to 147 servings of popcorn per hour, with each serving being 28 grams. This high-capacity output translates to roughly 4.16 kilograms of popcorn per hour, making it perfect for busy environments where speed and volume are crucial.
- ✓ The machine includes a built-in warming light that not only keeps the popcorn warm and fresh but also enhances its visual appeal, attracting customers. The clear glass panels allow customers to watch the popcorn popping, adding to the overall experience.
- ✓ Equipped with an easy-to-use control panel, this popcorn machine allows operators to manage popping and warming functions effortlessly. Its convenient design includes a drawer for collecting unpopped kernels, ensuring easy cleanup and maintenance.
