

ELECTRIC CONTROLLED COFFEE GRINDER

TKPE-NCG-540

STANDARD FEATURES

1.5Kg beans capacity

- ✓ 90 mm Flat Burrs for Superior Precision: Designed with large-diameter flat burrs, the NCG-540 delivers exceptional grind consistency and minimal heat generation — ensuring optimal flavor clarity for all brew methods.
- ✓ High-Performance 1000W Motor for Continuous Service: Built for demanding commercial use, the robust motor maintains consistent output and grind speed during peak hours — ideal for specialty coffee shops and high-volume service counters.
- ✓ Ultra-Fine Grinding Capability for Turkish Coffee: Capable of achieving extra-fine particle size for traditional Turkish coffee preparation, alongside espresso and filter — providing versatility across global brewing standards.
- ✓ Stepless Grind Adjustment for Full Control: Offers micrometric control over grind size, allowing baristas to fine-tune extraction from Turkish to French press with total precision.
- ✓ Sturdy Construction with Operator-Centric Design: Features an intuitive interface, large hopper capacity, and rugged housing to ensure ease of use, fast workflow, and long-term durability.
